

## FAG 22205E1-C3 Spherical Roller Bearing, Straight Bore

, Steel Cage, C3 Clearance, Metric, 25mm ID, 52mm OD, 18mm Width

### Product details

Brand FAG Bearings

Material Alloy Steel

Item Dimensions LxWxH 2.3 x 0.8 x 2.3 inches

Item Weight 0.35 Pounds

Certification DIN 623-1, ISO 281, ISO 492, ISO 683-17, DIN ISO 281

Bearing Type Ball Bearing

E1 Series two row spherical roller bearing with oversize rollers and maximum misalignment adjustment for applications that support high radial and oscillating axial loads

Pressed steel cage has high wear resistance and spaces the rollers for even load distribution and prevents contact to reduce friction, vibration, and noise

P5 precision on rings and hardened inner ring

C3 radial clearance is larger than normal for applications where impact loads and vibration are severe, or thermal expansion is a factor
