

FAG 6314 2RS Bearing Deep Groove Ball Bearing FAG

FAG Bearing 6314 zz deep groove ball bearing

Item: Bearing 6314

Size: 70*150*35mm

Material: Chrome steel; Stainless steel, Ceramic

Brand: Original FAG Bearing

Weight:2.55kgs

Application: Train,truck,machinery repair shop

Deep groove ball bearings are most representative of the rolling bearing. Widely used in high speed or high speed operation, and very durable, without regular maintenance. This kind of bearing friction coefficient is small, extreme high speed, simple structure, low cost, easy to achieve high manufacturing precision. Size range and diverse, used in precision instruments, low noise motors, automobiles, motorcycles and general machinery industries, the machinery industry, the most widely used class of bearings.
